

Coworking and restoration spaces

Madrid, Spain

ACCIONA Producciones y Diseño (APD) has remodeled the company's restoration spaces located in Alcobendas (Madrid).

The interior design project consists of two lounges located in the complex's two buildings. One of them has a typical white, wood-based Nordic style, while the other one is industrial style with lots of design and artisanal forge.

The rooms are multipurpose and are easily adaptable to the needs of the users and the time of day: such as dining rooms, work spaces, spaces for informal meetings, corporate events, presentations, etc. Thus, the spaces facilitate and promote interaction between users in a comfortable and relaxed environment.

The artisanal wrought-iron lighting fixtures and other elements, such as screen space dividers, provide a harmonious and functional atmosphere.

Both rooms integrate into their decor acoustic panels made of recycled material with a soundproofing capacity up to 85% and are placed on the walls, ceilings and room dividers to provide a sustainable and efficient use of these materials in the spaces.
